

CROSSING POINT

Adventurous Multi-Index  
PORTFOLIO

## Portfolio

The Adventurous Multi-Index Portfolio is a tactically traded passive growth strategy managed on a discretionary basis by Crossing Point Investment Managers. It is aimed at medium to long term investors who are seeking capital growth from a speculative portfolio of mainly equity investments.

The equity element of this portfolio can be 100% but may in times of market weakness be reduced to zero and be replaced by either UK government bonds or cash. Tactical trading strategies seek to invest heavily into equity when market momentum is rising but retain profits by moving to the security of gilts when market momentum falls. These strategies seek to enhance overall gain and reduce risk of loss.

<b>Equity</b>	
The maximum equity element of the portfolio	<b>100%</b>
The minimum equity element of the portfolio	<b>0%</b>
<b>Management Fees</b>	<b>0.36%</b>
Discretionary Management Fees Inclusive of VAT	
<b>Fund Costs</b>	<b>0.2%</b>
The total expected charge of fund management

<b>Risk Score</b>	<b>7</b>
Prospective Risk Score	

The chosen passive index tracking funds can invest in UK and overseas equities, commercial property, fixed interest securities, natural resources, precious metals or cash. Index tracking funds replicate the stockholding of an underlying index. Since these funds track the composition and performance of the underlying index, there are low levels of human involvement and so these funds have a lower total costs.

The Adventurous Multi-Index Portfolio is benchmarked against the average performance of the IA Flexible Investment Sector and has a risk rating and investor profile of 7 out of 10.

## Performance ratios - over 3 years

Prospective Risk Level

Historic Risk Level

Prospective Risk Level

The prospective portfolio risk level represents the expected level of future volatility of the combination of asset classes determined by using objective mathematical modelling tools taking into account past data and implied market data in the future. This derivation is based on the current asset class composition of the portfolio.

Historic Risk Level

The historic portfolio risk level represents the historic volatility over the period 30/06/2015 to 30/06/2018, and takes into account the changing composition of the portfolio over that period of time.

## Prospective Risk Score Over 3 Years

Risk No	Volatility	Alpha	Beta	Sharpe	Information Ratio	Max Loss	Max Gain	Negative Periods	Positive Periods
5	7.08	10.11	0.73	1.77	1.43	-3.64	28.34	10	26

## Cumulative Performance Chart

KEY Adventurous — Benchmark — ○ Automated Switch

Cumulative performance chart shows % growth from 01/01/2017 to 30/07/2018 calculated using bid prices with income re-invested into the fund net of tax. The cumulative performance chart shows how the portfolio has performed against the benchmark taking into account the changing composition of the portfolio over the period of time shown.

## Cumulative Performance: % Growth to 30/07/2018
